Make alignment corrections.

Whole blog text is not shown, it places an ellipsis in the end.

The blog Title get under the image instead of getting on the top.

Some icons

Click redirections on mail and phone.

Clicking on the phone or enter email text field makes the icon disappear.

There is a gap under every header some are bigger and some are smaller.

PETIT BEAUTIFUL OIL, CREAM BLUSH, INVISIBLE TOUCH LIQUID FOUNDATION

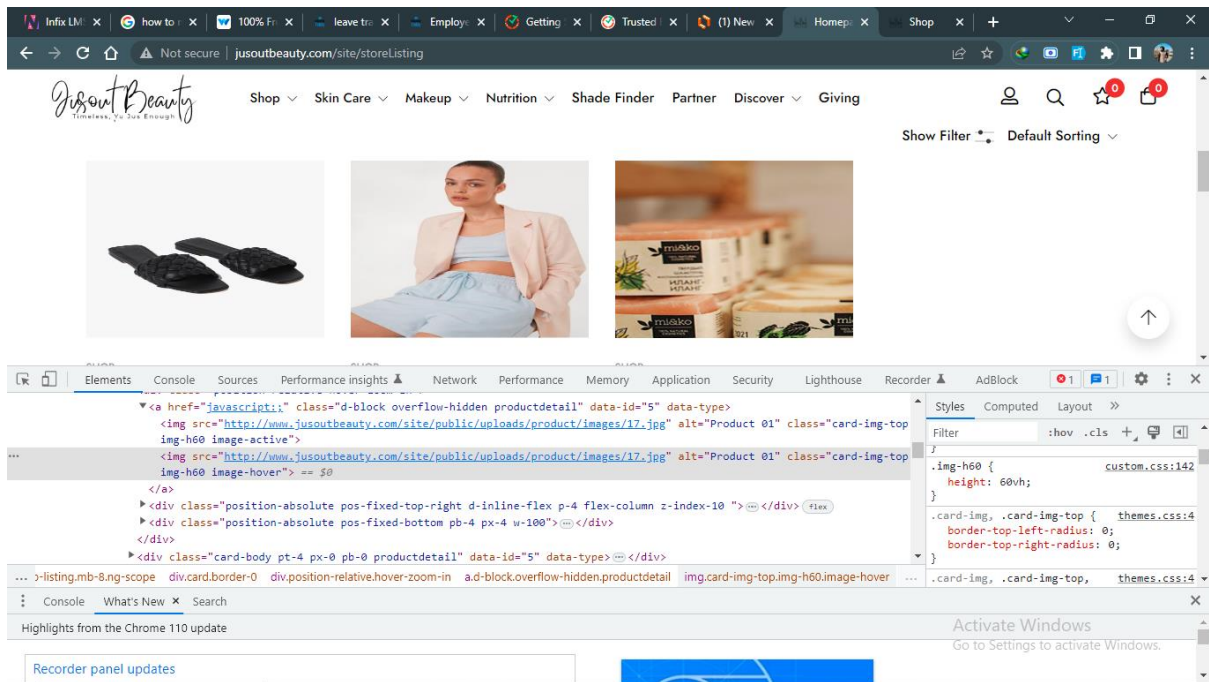

There are tabs in actual design but tabs in the website.

Now review stars in the website but they are present in the design.

The image height is set to 60 even after the image is placed in 'col-6' this thing effects in the responsiveness of the website.

But making it auto effects the size of some other images (makes it smaller than other)
