Overview page.

Amendment 1

When I click on +Add New, this is how it appears.

Still continuing on the add new button pop up

Target role – this is a search function, not a drop down function. We have 1000 of jobs in our database, it will need to search from there

Package – can we hide this for now, once the finance page is made, then we can bring it back.
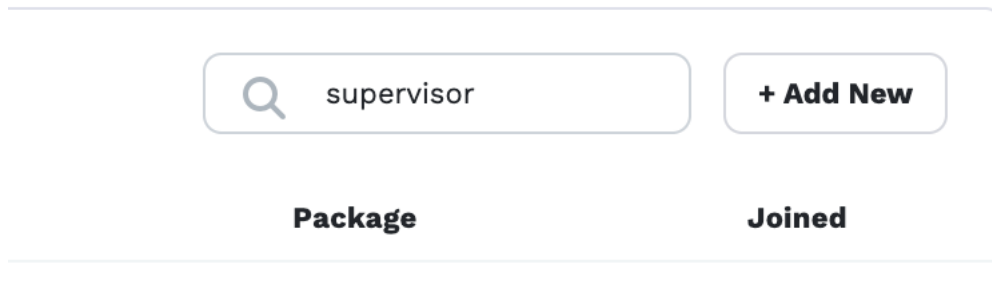

Amendment 2

These are way too big, make them smaller, like it was in the design, that's a nice size

Amendment 3

Search capability doesn't work

Amendment 4
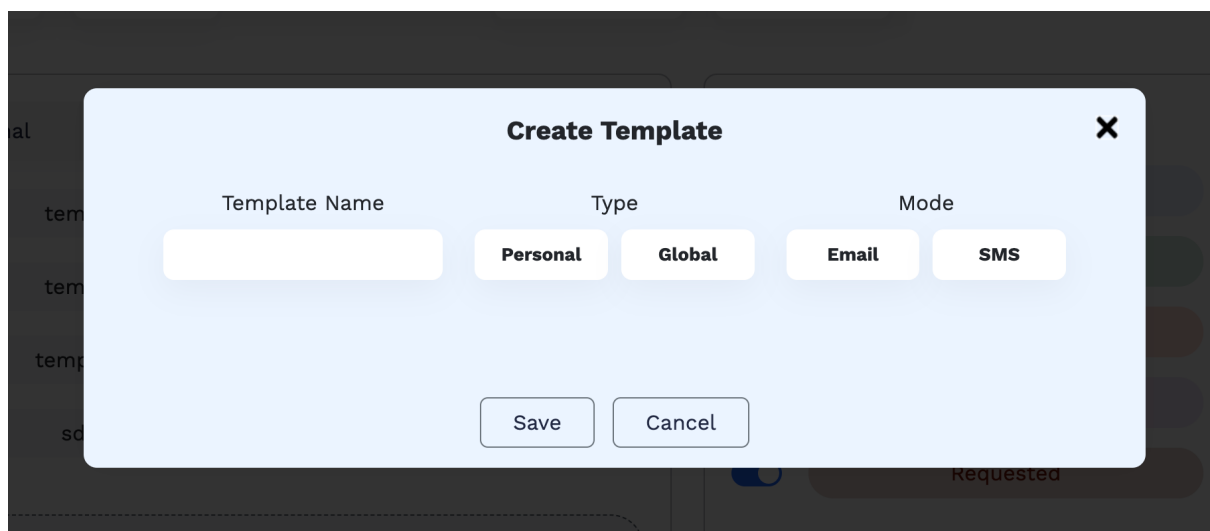

This search button doesn't do anything.

Amendment 5

Settings > Overview page

The user if it is not an administrator should not be able to change their details.

Only thing they can change is the password. Everything else should be locked.

Settings > Tags

When I click on create template, there is no option to write content.

Settings > Employees

Can we make the names alphabetical please.

Adhoc.

Role below which are turned off, they should not appear when inviting a staff member
